

SUMMARY

Detail-oriented Data Analyst skilled in SQL, Python, Tableau, and Power BI. Experienced in ETL, predictive modeling, and automation to deliver actionable insights and support strategic business decisions.

EXPERIENCE

Community Dreams Foundation

Data Analyst

Remote - Florida, USA
September 2024 - Present

- Led cross-functional data initiatives using Power BI and ETL pipelines to analyze user behavior, campaign performance, and funding trends, ensuring alignment with strategic business objectives.
- Optimized fraud detection efficiency by implementing data-driven insights in SQL and Python, significantly reducing process review periods and improving onboarding metrics
- Managed and visualized key performance indicators (KPIs) using Tableau dashboards; enhanced reporting efficiency by 40% and accelerated project delivery timelines by 30% through Agile collaboration.

Swadist

Business Analyst Intern

New Jersey, USA
June 2023 - July 2024

- Conducted sentiment analysis and built predictive sales models using Python, improving customer retention by 5% and contributing to \$150K in additional revenue.
- Automated data workflows and inventory tracking dashboards using SQL, reducing manual errors by 40% and cutting operational costs by 60%.
- Executed strategic automation protocols, incorporating data-driven insights to optimize enterprise processes and achieve a 35% wait time reduction.

NYIT

Graduate Assistant - Quantitative and Business Analytics Department

New York, USA
October 2023 - January 2024

- Supported academic research through quantitative analysis and predictive modeling using Python, R, and SPSS, improving trend forecasting accuracy by 20%.
- Conducted training for 50+ students on SQL, Tableau, and Excel, enhancing analytical and technical skill development.

Amazon

Automation Analyst

Bengaluru, India
September 2020 - August 2022

- Automated pricing workflows for 700K+ products using Python, SQL, and AWS, reducing manual efforts by 50% and improving operational efficiency.
- Conducted web scraping and competitor analysis to develop data-driven pricing strategies, enhancing market competitiveness and deal accuracy.
- Implemented scalable automation solutions to streamline product identification and pricing processes across large datasets.

Visonavi Devi Designs

Business Analyst

Bengaluru, India
January 2015 - August 2016

- Automated customer service workflows using Excel , reducing support tickets by 10% and enhancing customer experience.
 - Designed interactive Tableau dashboards to improve sales forecasting and deliver actionable business insights.
 - Conducted market research and competitive analysis to support data-driven strategy and business growth initiatives.
-

EDUCATION

MBA in Business Analytics

New York Institute of Technology • 3.7/4

NY, USA
2024

Bachelor of Engineering (Electronics & Communication Engineering)

Vidyavardhaka College of Engineering

India

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate(PL-300)

AWS Certified Cloud Practitioner(CLF-C02)

Data Science: Visualization by HarvardX

SKILLS

Languages: Python, SQL

Data Analysis & Modeling: NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, ggplot2

BI & Visualization: Tableau, Power BI, Advanced Excel (VLOOKUP, HLOOKUP, Pivot Tables)

Cloud Platforms: AWS, Azure, Snowflake

Project Management& Reporting: Agile, Scrum, Kanban, MS Project

Other Skills: Predictive Analysis, ETL, Process Optimization, Data Cleaning, Continuous Improvement, Automation, Cross Functional Collaboration, Problem-Solving, Critical Thinking, Communication
